

SCHOOL OF THE AIR, BROKEN HILL

Lyn and Anita were invited to present a workshop of Educational Kinesiology (Edu-K) in Broken Hill by Jim Hooson of Learning Creations, Sydney.

During their time in Broken Hill Anita taught a four day workshop on Edu-K while Lyn had a number of private consultations with interested people.

The course and consultations were held in the 'School of the Air' classrooms.

There were a number of encouraging reports that people had experienced changes in their abilities to read and write.

All of the teachers present were excited as to how these new skills and tools could be used for their students in Broken Hill and outlying areas.

Before leaving Lyn and Anita provided dates to the School of the Air for follow up courses or a repeat of the one now in place. The Brain Gym course which was presented in April has much more to offer than already experienced.

A fun time on the floor of a classroom in the School of the Air building. Cross patterning with a difference!
